

Texas A&M University

RESPONSIBLE CONDUCT *of Research*

Texas A&M University is committed to supporting responsible and ethical conduct of research and scholarship among its faculty, staff, and students. As such, the University follows federal, state, and university guidelines regarding Responsible Conduct of Research (RCR).

A campus-wide environment pertaining to responsible conduct of research requires researchers to have the knowledge, skills, and tools to allow them to be responsible for their research conduct. Knowledge areas depending on research focus may include topics such as authorship, plagiarism, peer review, human subjects protections, animal welfare, clinical

practice, data acquisition, management, sharing and ownership, conflict of interest, collaborative research, export controls, research expenditures, and research misconduct, among others.

Please check for updates to the new University SAP and upcoming workshop information at vpr.tamu.edu.

promote academic practices that encourage honesty and scientific integrity
