

Responsible Conduct of Research Course Equivalent Approval Request

As detailed in TAMU SAP 15.99.99.M0.04 Responsible Conduct of Research, four hours of face-to-face training is required for graduate students participating in externally funded research and all postdoctoral researchers. However, we understand that many departments already offer a course that covers many of the RCR training topics. These courses must be submitted for review and approval by the COI/RCR. This approval must take place before the course may be counted toward the RCR training requirements.

Elective Training

Training Title:

Instructor(s):

Department/Unit:

Method of Delivery: In-Person Online Approximate Length of Training:

RCR Themes Incorporated (Select all that apply):

Laboratory and Biosafety
