

Microbiota Research Interest Group

Research Networking Event

Tuesday, Nov. 8, 2016

1–4:00 p.m.

Bethancourt Ballroom
MSC 2300 A and D

This event brings together Texas A&M principal investigators who are interested in microbial communities in the broadest sense including

- Impact on human health and disease
- Impact on animal health and disease
- Ecological and agricultural microbiomes
- Meta-omics and bioinformatics
- Novel intersections with microbiota

Presentations: PIs are invited to present their ongoing microbiota-related research in a flash talk highlighting their area of expertise.

Facilitator-led breakout tables will allow PIs to connect with potential collaborators in four currently identified theme areas: human health and disease; animal health and disease; ecological and agricultural microbiomes; and tools and technologies.

Schedule

1:00 p.m. Presentations

2:30 p.m. Breakout Discussions

3:00 p.m. Networking and Poster Session

Register by

5:00 p.m., Tue., Nov. 1

<https://u.tamu.edu/Nov8>

- **Open to all principal investigators, faculty, and research staff.**
- **Admittance is free, but registration is *required*.**

Event Conveners

Human Health and Disease

Robert Alaniz

College of Medicine

Animal Health and Disease

Jan Suchodolski

College of Veterinary Medicine & Biomedical Sciences

Ecology and Agricultural Microbiomes

Jeff Tomberlin

College of Agriculture and Life Sciences

Tools and Technologies

Arul Jayaraman

Dwight Look College of Engineering
