
	WORKSHEET: Drugs and Biologics		
	NUMBER	DATE	PAGE
	HRP-306	5/1/2022	1 of 2

The purpose of this worksheet is to provide support for IRB staff pre-reviewing research involving drugs. This worksheet is to be used. It does not need to be completed or retained.¹

1 Drug Applicability	
<input type="checkbox"/>	Does the activity involve any the following? (Check all that apply) If “No” to both, FDA regulations do not apply. <input type="checkbox"/> In the United States: The use of a drug ⁱ or a biological product (biologic) ⁱⁱ in one or more persons other than use of an approved drug in the course of medical practice ⁱⁱⁱ . <input type="checkbox"/> Data regarding subjects or control subjects submitted to or held for inspection by FDA ^{iv} .
2 IND Requirements^v (Check if “Yes”. One must be “Yes” If all are “No” IND information is not complete.)	
<input type="checkbox"/>	The drug has a valid IND. (Complete Sections 3 and 4)
<input type="checkbox"/>	The drug is exempt from the IND requirements (Complete Section 5)
<input type="checkbox"/>	The research is conducted outside of the United States and is conducted under ICH-GCP.
3 IND Validation (Check if “Yes”. At least one must be “Yes” If all are “No” IND cannot be validated.)	
<input type="checkbox"/>	Sponsor protocol imprinted with the IND number.
<input type="checkbox"/>	Written communication from the sponsor documenting the IND number.
<input type="checkbox"/>	Written communication from the FDA documenting the IND number. (Required if the investigator holds the IND.)
4 Drug or Biologic Control (Check if “Yes”. Must be “Yes” If “No” information regarding drug control is incomplete.)	
<input type="checkbox"/>	The plan for storage, control, and dispensing of the drug is adequate to ensure that only authorized investigators will use the drug and that they will use the drug only in subjects who have provided consent. ^{vi}
When following ICH-GCP (E6)	
<input type="checkbox"/>	Investigational products will be manufactured, handled and stored in accordance with good manufacturing practice.
<input type="checkbox"/>	Where allowed or required the investigator may assign some or all duties for investigational product accountability at the trial site to an appropriate pharmacist or another appropriate individual who is under the supervision of the investigator.
<input type="checkbox"/>	The investigator, pharmacist, or other designated individual, will maintain records of the products delivery to the trial site, the inventory at the site, the use by each participant, and the return to the sponsor or alternative disposition of unused products. These records should include dates, quantities, batch/serial numbers, expiration dates (if applicable), and the unique code assigned to the investigational products and trial participants.
5 IND Exemptions (Check if “Yes”. All criteria for one category must be “Yes” to be met. If none are met, the drug is not exempt from an IND.)	
<input type="checkbox"/> Category #1 - Lawfully Marketed Drugs (21 CFR 312.2(b)(1))	
<input type="checkbox"/>	The drug or biologic is lawfully marketed in the United States.
<input type="checkbox"/>	The research is not intended to be reported to the FDA as a well-controlled study in support of a new indication for use nor intended to be used to support any other significant change in the labeling for the drug.
<input type="checkbox"/>	The research is not intended to support a significant change in the advertising for the product.
<input type="checkbox"/>	The research does not involve a route of administration or dosage level or use in a patient population or other factor that significantly increases the risks (or decreases the acceptability of the risks) associated with the use of the drug product.
<input type="checkbox"/>	The research is conducted in compliance with the marketing limitations described in 21 CFR §312.7.
<input type="checkbox"/> Category #2 - Serological Tests (21 CFR 312.2(b)(2))	
<input type="checkbox"/>	A clinical investigation for an in vitro diagnostic ^{vii} biological product that involves one or more of the following: (1) Blood grouping serum; (2) Reagent red blood cells; or (3) Anti-human globulin.
<input type="checkbox"/>	The diagnostic test is intended to be used in a diagnostic procedure that confirms the diagnosis made by another, medically established, diagnostic product or procedure.
<input type="checkbox"/>	The diagnostic test is shipped in compliance with 21 CFR §312.160.
<input type="checkbox"/> Category #3 - Placebos (21 CFR 312.2(b)(5))	
<input type="checkbox"/>	A clinical investigation involving use of a placebo when the investigation does not otherwise require submission of an IND.
<input type="checkbox"/> Category #4: Bioavailability/Bioequivalence Studies (21 CFR 320.31(b) and (d))	
<input type="checkbox"/>	The active moiety in the drug product is identical to that in an FDA approved drug.
<input type="checkbox"/>	The drug product is not radioactively labeled.
<input type="checkbox"/>	The drug product is not cytotoxic.
<input type="checkbox"/>	The dose (single or total daily) does not exceed the dose in the labeling of the approved version of the drug product.

¹ This document satisfies AAHRPP elements I.7.A, I.7.B

	WORKSHEET: Drugs and Biologics		
	NUMBER	DATE	PAGE
	HRP-306	5/1/2022	2 of 2

<input type="checkbox"/>	The sponsor meets the requirements for retention of test article samples in 21 CFR 320.31(d)(1).
<input type="checkbox"/> Category #5: Radioactive Drugs for Research Use (21 CFR 361.1)	
<input type="checkbox"/>	The drug has been approved by Radioactive Drug Research Committee as a radioactive drugs for certain research use under the criteria in 21 CFR 361.1(b)
<input type="checkbox"/> Category #6: Cold Isotopes for Research Use (FDA enforcement discretion^{viii})	
<input type="checkbox"/>	The research is intended to obtain basic information regarding the metabolism (including kinetics, distribution, and localization) of a drug labeled with a cold isotope or regarding human physiology, pathophysiology, or biochemistry.
<input type="checkbox"/>	The research is not intended for immediate therapeutic, diagnostic, or preventive benefit to the study subject.
<input type="checkbox"/>	The dose to be administered is known not to cause any clinically detectable pharmacologic effect in humans based on clinical data from published literature or other valid human studies.
<input type="checkbox"/>	The quality of the cold isotope meets relevant quality standard.
6 IND Oversight for investigators who hold the IND (Check if “Yes”. One of the following must be “Yes” if the investigator holds the IND)	
<input type="checkbox"/>	The FDA requirements of a sponsor (including GMP when applicable) have been assumed by a contract research organization.
<input type="checkbox"/>	An audit has documented that the investigator is compliant with FDA sponsor requirements (including GMP when applicable).

ⁱ The term “drug” means:

- (A) articles recognized in the official United States Pharmacopoeia, official Homoeopathic Pharmacopoeia of the United States, or official National Formulary, or any supplement to any of them; and
- (B) articles intended for use in the diagnosis, cure, mitigation, treatment, or prevention of disease in man or other animals; and
- (C) articles (other than food and dietary supplements) intended to affect the structure or any function of the body of man or other animals; and
- (D) articles intended for use as a component of any article specified in clause (A), (B), or (C).

ⁱⁱ The term “biological product” means a virus, therapeutic serum, toxin, antitoxin, vaccine, blood, blood component or derivative, allergenic product, protein, or analogous product, or arsphenamine or derivative of arsphenamine (or any other trivalent organic arsenic compound), applicable to the prevention, treatment, or cure of a disease or condition of human beings.

ⁱⁱⁱ “Other than the use of an approved drug in the course of medical practice” refers to a practitioner providing an approved drug to a patient because the practitioner believes the drug to be in the best interests of the patient. If the protocol specifies the use of the drug, it is not in the course of medical practice unless use of the drug is completely up to the discretion of the practitioner.

^{iv} This is specific to submissions that are part of an application for a research or marketing permit. However, unless otherwise indicated, assume all submissions to FDA meet this requirement.

^v If there are questions about which category is appropriate, have the investigator apply for an IND following 21 CFR §312.23.

^{vi} The investigator or other designated individual must maintain records of the product's delivery to the clinical trial site, the inventory at the site, the use by each subject, and the return to the Sponsor or alternative disposition of unused products. These records include dates, quantities, batch or serial numbers, and Expiration Dates (if applicable), and the unique code numbers assigned to the investigational products and trial subjects. The investigator must maintain records that document adequately that the subjects are provided the doses specified by the protocol and reconcile all investigational products received from the Sponsor.

^{vii} An in vitro diagnostic (IVD) products are those reagents, instruments, and systems intended for use in the diagnosis of disease or other conditions, including a determination of the state of health, in order to cure, mitigate, treat, or prevent disease or its sequelae. Such products are intended for use in the collection, preparation, and examination of specimens taken from the human body. IVD products are devices as defined in section 201(h) of the Act and may also be biological products subject to section 351 of the Public Health Service Act.
