## LARGE PROPOSALS

The **Large Proposal Development Team** supports the Texas A&M research community in pursuing external research funding by providing a full array of proposal-development services for large, strategic and/or multidisciplinary funding opportunities.

Limited submissions are funding opportunities from sponsors that limit the number of submissions an institution may submit. Research Development Services (RDS) manages the limited submission process for Texas A&M's AgriLife, TEES, HSC and TAMU. Visit our website for complete process description.
