Texas A&M University’s standing today—as one of the largest research universities in the United States—is testament to more than 125 years of visionary planning and strategic investment.

Texas A&M’s rare triple designation as a land-, sea-, and space-grant institution reflects the broad scope of its research, which includes ongoing projects funded by prominent and diverse agencies such as NASA, the National Institutes of Health, the National Science Foundation, and the Office of Naval Research. As a member of the prestigious Association of American Universities—one of only sixty-five institutions with this distinction—Texas A&M has branch campuses in Galveston, Texas, and Doha, Qatar. The university maintains formal agreements for research collaborations and faculty–student exchanges with more than 117 institutions in forty countries, plus active research programs on all continents.

INNOVATION AT TEXAS A&M
Cited nationally for “tangible contributions to the public interest,” Texas A&M remains true to its land-grant mission. Texas A&M turns discovery into deeds, develops tools and expertise designed for real-world applications, and delivers products and services that improve the lives of Texans.

The Texas A&M Transportation Institute (TTI) has a breadth and depth of programs, facilities, and capabilities unsurpassed by any other higher-education-affiliated transportation research organization in the United States. Texas A&M AgriLife Research is the state’s premier research agency in agriculture, natural resources, and the life sciences. The Texas A&M Engineering Experiment Station (TEES) serves the state through engineering and technology-oriented research and educational collaborations.

Combined, their research significantly impacts the health, safety, and quality of life of Texas citizens and contributes to the state’s economic growth and development.

CENTERS AND INSTITUTES
Research centers and institutes play an important role in the research and academic landscape at Texas A&M, bringing together scholars and scientists—often from different disciplines—to tackle major research challenges. View a complete list at research.tamu.edu

DIVISION CENTERS AND INSTITUTES
Core facilities in the division provide researchers and students access to state-of-the-art instrumentation, technologies, and specialized scientific services. These include:
- High Performance Research Computing
- International Ocean Discovery Program (IODP)
- Microscopy and Imaging Center
- Texas A&M College Sea Grant Program
- Texas A&M Energy Institute
- Texas A&M Global Cyber Research Institute endowed by Ray Rothrock ’77 and Anthony Wood ’90
- Texas A&M Global Health Research Complex
- Texas A&M Institute for Disaster Resilient Texas
- Texas A&M Institute for Genome Sciences and Society
- Texas A&M Institute for Neuroscience
- Texas A&M Institute of Data Science

FACULTY HONORS

13 Members American Academy of Arts and Sciences
53 Faculty AAAS Fellows
16 Members American Law Institute
7 Members John Simon Guggenheim Memorial Foundation Fellows
34 Members National Academy of Engineering
15 Members National Academy of Inventors
11 Members National Academy of Inventors Senior Fellows
5 Members National Academy of Medicine
6 Members American Academy of Nursing
15 Members National Academy of Sciences
47 Recipients Traditional Fulbright Fellowship
94 Faculty University Distinguished Professors
3 Recipients Wolf Prize

FACULTY NOBEL PRIZES

Dudley R. Herschbach Nobel Prize in Chemistry, 1986
David M. Lee Nobel Prize in Physics, 1996

RESEARCH EXPENDITURES | FY 2022 Dollars in Millions
